EDUCATION

University Of North Carolina Chapel Hill

Data Science B.S. & Concentration in AI & Machine Learning; GPA: 3.84, Graduation: May 2028

Relevant Coursework: Predictive Models & Visualizations, Feature Engineering, Optimizing Logistic Regression, Methods of Data Analysis, Multivariate Calculus, Linear Algebra, Ethics of AI

Technical Skills**:** Python; numpy, scikit-learn, matplotlib, pandas; R; tidyverse, Git

North Carolina Governor's School Meredith College, NC

- Nominated to apply by Rolesville High School; accepted from 16% of applicants statewide
- Graduated from the summer residential course with a focus in English Literature and writing

EXPERIENCE

Breakthrough Tech with Cornell University Remote

AI/ML Fellow May 2026 – May 2027

- Selected from 2000+ applicants for the highly competitive, year-long AI Program
- Certified in Machine Learning from Cornell University's 6-week program
- Vectorized text data to implement an augmented retrieval system that followed specific token limits
- Explored Deep Neural Networks, RAG Systems, and used OpenAI's API to build chatbots tailored to synthetic company data to answer questions about private data

CES Power/Roundrock Technology Raleigh, NC

Intern Jun 2022 – Jan 2024

- Worked with the IT Department to locate and manage 100+ company assets, including products for network design and CCTV technology, transferring them to the new company software
- Met with Internal Sales and Project Management team to document travel expenses and itineraries for contracted employees

PROJECTS

Carolina Data Challenge: Closing the High School Graduation Gap Sep 2026

- Created Linear Regression, KNN, and Decision Tree prediction models based on educational dataset
- Used Streamlit in Python to create an interactive dashboard map of North Carolina displaying current issues counties face today such as; lead exposure risk, low access to internet, and important indicators

Predicting Premier League Team Success Aug - Dec 2025

- Gathered injury and player statistics data to build a Multiple Linear Regression Model based on features correlation matrix
- Used 600+ injury records to predict how much different injuries would cost teams with 89% accuracy

LEADERSHIP & ACTIVITIES

Phi Sigma Pi National Honor Fraternity Chapel Hill, NC

Recruitment Chair & Service Chair Apr 2026 – Dec 2026

- Elected and organized 10+ events to recruit new members, and led presentations at each
- Currently working on a semester-long service project, 'Walls of Love,' that gives people in need access to important items including hygiene products, clothing, and food

SKILLS & INTERESTS

Certifications: Machine Learning Foundations Course Completion from Cornell University, Certified in Adobe Photoshop & Adobe Illustrator from Certiport

Affiliations: Girls Who Code, Phi Sigma Pi Honors Fraternity, Blank Canvas, OSTEM

Interests: Service & Volunteering, Hackathons, Sewing, Graphic Design, Creative Projects
